FirstNet
CLOUD BACKUP

"Where are your backups?"

"Are you sure that you will be able to recover data fast and reliably?"

"Does your business have offsite backups?"

These are questions that businesses are having to answer on a more regular basis. The FirstNet Cloud Backup allows you to backup irreplaceable data from your desktops, laptops and servers. With state of the art software and robust infrastructure, we provide you with an online backup service that ensures rapid recovery of your business critical data.

How it works

An agent is installed on each workstation or server you wish to protect. After the initial configuration, automatic backups occur that can be monitored and manage remotely.

Bare-metal and Staged backups are available, allowing the creation of onsite backups that are replicated into the FirstNet Cloud backup environment for offsite storage.

Benefits to your business

- Minimize data loss, damage & business integrity.
- Move data off-site and to the cloud for disaster recovery.
- Maximize IT productivity- automate data protection and recovery
- Take your business continuity and DR strategies to the next level.
- Online backups are the easiest and surest way to protect your data.
- Offsite backups ensures that you can recover your data even in case of a physical disaster, theft or loss.
- Online backups eliminate many of the error prone steps associated with traditional backup methods like tape. Users can restore 'point in time' versions of files without collecting and loading tapes.
- With our online backup solution, your data is encrypted and compressed even before it leaves your computers and servers.
- After the first full backup, only incremental block level changes are sent – optimizing bandwidth & storage usage.
- Monthly Service, No long term contracts.

Features

- Intuitive & user friendly interface
- Backup workstations & servers
- Backup all kinds of data: Files, Microsoft Outlook, Microsoft Exchange, Microsoft SQL, Microsoft SharePoint and MYSQL.
- Military strength encryption
- Notifications and alerts
- Customizable Retention
- Powerful Compression.
