

FirstFibre

- High Speed, Low latency connectivity
- Available in all major metro areas
- Connect your branches at LAN speeds
- Connect to the FirstNet Data Centres or site-to-site
- Monitored and managed by FirstNet

FirstFibre is a last mile fibre access solution that enables customers within our coverage zones to enjoy truly high-speed connectivity, either back to the FirstNet data centres or between branch sites. Our infrastructure can handle bandwidths far bigger than the anticipated broadband traffic requirements of South Africa over the next 20 years. Additional fibre can be commissioned and installed at short notice to suit clients' need and ability.

Connecting within a FirstNet Aggregation zone

- 1Gb or 10Gb fibre service to connect a site to the closest FirstNet POP
- Fixed installation and monthly costs
- Must be within the 5Km radius from the centre of the Aggregation Zone
- Two or more sites within the same Aggregation Zone can take advantage of an unshaped, uncapped 1Gb or 10Gb service.

Back-haul between zones

- Shaped fibre service to connect between Aggregation Zones
- Pricing dependant on distance and bandwidth requirements
- Required to connect two or more sites together that fall into different Aggregation Zones
- Upgrades can be effective within hours
- 99.95% SLA with 4 hour call to fix

Site-to-site

- Unlit, unshaped fibre service to connect two sites direct point to point.
- Can run Ethernet, DWDM or Fibre Channel.
- Pricing based on "line of site distance" and is cost effective over short distances
- Redundant link offered at 50% discount of the primary link.
- 99.95% SLA with 4 hours to fix on single link.
