

# FirstNet Website Hosting Website Development

## Get the Competitive Advantage with your website

Make sure that your online presence is geared towards getting your business where it needs to go, with the help of web development and hosting powered by FirstNet.

At FirstNet, we believe that your website is an online representation of your physical business. As such, your website should receive the attention it deserves. Through careful analysis and tailored website development, we help you provide your visitors with a flawless, appealing, highly functional website that is responsive and driven to convert more sales.

Channelling your ideas in a way that makes sense without losing visual impact is what we do best. Our process starts with finding out what you want from your website, and helping you decide what your customers expect from your website. From there, the extensive team of designers and developers take over.

## What Makes Our Approach to Web Design Unique?

Our sites are all built on Open Source Software, so you will have full ownership of your website.

Dont settle for any out-the-box packages or cookie-cutter websites that lack individuality. FirstNet will design your site to be **unique and, one-of-a-kind**.

Every website that we produce is responsive. That means that the website changes its layout depending on if you are viewing it from a smartphone, tablet or desktop computer.

Team up your website with our internet marketing solutions, and you will not only increase your website ROI but also gain a leading edge in today's ultra-competitive business environment.

We have developers with a depth of skill and wide range of experience (PHP, ASP, ASP.net, jQuery, Java, MySQL), so if you need your eCommerce website to integrate within your Document Management System, it's not a problem.

### Need to make a change?

- You have full control over your website and can make changes to your own site
- Every site is built with a Content Management System (CMS) such as the powerful, easy-to-use Wordpress platform

## Why FirstNet?

- We can build and host your website
- Web Development that grabs your visitor's attention
- You have full ownership and control
- Experienced Developers
- Integrated Website services
- Responsive design optimized for different devices
- Online Marketing Solutions
- We have our own Data centre where your website will be hosted

## Web site hosting

FirstNet has its own hosting platform data centres in Durban, Cape Town & Johannesburg. Your website and your data will be secure.
