

FirstNet ETHERCONNECT

When it comes to connectivity for your national or global enterprise, FirstNet's EtherConnect suite allows you to meet diverse requirements with flexible, high-performance Layer 2 and Layer 3 networking services.

Take advantage of our presence in leading data centers, where you can securely and privately connect to cloud-based services and applications.

We have flexible commercial models, allowing you to easily scale bandwidth and add sites as needed.

VPLS / MPLS / ETHERNET

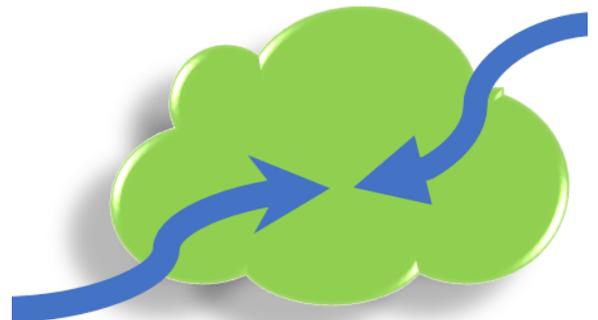

We offer scalable network connectivity for the most demanding traffic types, our Virtual Private LAN Services (VPLS) provides any-to-any connectivity, extending your network across multiple locations. Backed by our secure MPLS network which offers customers end-to-end guaranteed service and isolates traffic flows across our backbone. Our Ethernet services are ideally suited for customers needing point to point and point to multipoint solutions for backup and disaster recovery.

Benefits to your business

- Resilient and Reliable
- Flexible Bandwidth Options
- Guaranteed Performance
- Connect Directly to leading cloud providers
- Multipoint configuration—fully meshed
- EVC's combine multiple traffic types and protocols on a single connection
- 99.5% SLA
- MTTR of 4 hours

Features

- Our network is built upon diverse, redundant fiber paths between all of our PoP locations. MPLS Traffic Engineering provides the most direct, lowest latency path possible for an optimal end-user experience, automatically rerouting traffic as required.
- We provide diverse bandwidth options, including flat-rate billing as well as burstable ports to meet data spikes.
- Peering agreements with leading cloud providers such as IBM Cloud, Amazon Web Services (AWS), Microsoft Azure and Google Cloud Platform allow us to provide direct, private and secure connectivity, ensuring the highest possible performance for your mission-critical applications and services.
