

Security · Cloudflare, managed by FirstNet

Protect every app. At the edge.

Cloudflare's global edge, including Johannesburg and Cape Town, protects your public apps and users. FirstNet designs, hardens and tunes it for you, with South African engineers on your side.

300+

cities on Cloudflare's global network

JNB + CPT

local points of presence in Johannesburg and Cape Town

1 platform

applications, Zero Trust and network on one control plane

1 provider

one FirstNet contract and one escalation path

Sound familiar?

- Your websites, portals or APIs are targeted by attacks, bots or abuse
- Your VPN is slow, exposed or hard to extend to contractors
- You pay separately for WAF, DDoS, CDN, web filtering and VPN
- Branch and remote users complain about cloud app performance
- Audits or your cyber-insurance renewal demand evidence of controls

One edge, one control plane. No appliances to deploy and no scrubbing-centre redirect. Consolidate separate WAF, DDoS, CDN, web gateway and VPN contracts.

One platform, three ways to protect your business

Protect your applications

Keep websites, portals and APIs online and secure, with always-on L3/L4 and L7 mitigation.
WAF · DDoS protection · Bot Management · API Shield · CDN and Argo Smart Routing

Secure your people

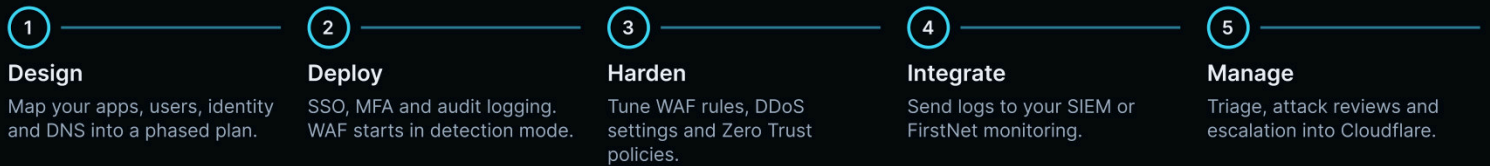

Retire the VPN. Identity-aware access for staff and contractors, with no inbound listeners and no backhaul to head office.
Access (ZTNA) · Gateway (SWG) · Browser Isolation · CASB and DLP

Modernise your network

Always-on DDoS protection for your whole IP range via BGP, and branches, data centres and cloud on one fabric.
Magic Transit · Magic WAN · Magic Firewall

Start where it hurts, then expand. Most customers begin with one pillar and add modules over time.

What FirstNet does for you

Why FirstNet

- ✓ **One accountable provider** for connectivity, cloud, security and voice, with one Rapid Response entry point.
- ✓ **Joined up with your network.** Zero Trust on FirstNet SD-WAN, the WAF in front of apps we host, Magic Transit on FirstNet IP Transit.
- ✓ **Local engineers** aligned to your change windows and South African working hours.
- ✓ **Cloudflare MSSP partner**, ICASA-licensed group, ISO 27001:2022 and ISO 9001.

Getting started

- 1 30-minute discovery call.** What is driving the project: an attack, a VPN refresh, a renewal or consolidation.
- 2 Design session.** We map your apps, users and tools, and agree a phased plan.
- 3 Scoped pilot.** Prove it on your own traffic before a wider rollout.

What we will need from you: your identity provider details, control of your DNS and a named technical contact.

Let's elevate your **security**.

Book a Cloudflare discovery session with your FirstNet account team.
