

Voice · Wholesale Voice Termination

Licensed SA voice. Carrier-grade.

Licensed local calling for carriers, ISPs and aggregators over a carrier-grade IP connection, with twin geo-redundant data centres and direct interconnects to South Africa's networks.

SA termination

licensed local calling at scale

Geo-redundant

twin data centres in Johannesburg and Cape Town

Clean handoff

carrier-to-carrier connection over IP

Scalable

capacity that grows with your volume

Who it's for

- Licensed carriers and reseller carriers
- ISPs adding voice to their stack
- Mobile virtual operators and platform aggregators
- International carriers needing an SA breakout

Predictable quality on the routes that matter. Transparent call-quality reporting, and engineering support when something doesn't go to plan.

Wholesale voice, built for carriers

Termination and origination

Licensed South African voice termination and origination over a carrier-grade IP-based interconnect.
[Direct SA mobile and fixed-line interconnects](#) · [Multiple upstream interconnects](#) · [Redundant routing](#)

Resilience and visibility

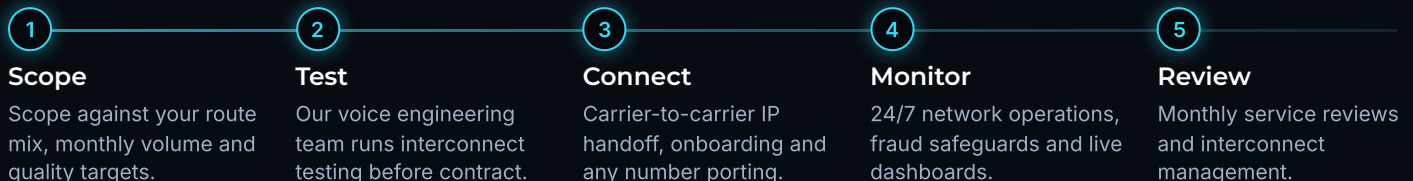

Twin geo-redundant data centres, with transparent reporting on the quality of your traffic.
[Johannesburg and Cape Town data centres](#) · [Call-quality reporting](#) · [Live dashboards](#)

Protection and operations

Round-the-clock network operations and fraud controls to protect your routes.
[24/7 NOC](#) · [Fraud monitoring](#) · [Anomaly detection](#) · [Destination blocking](#) · [API-ready provisioning](#)

Optional add-ons: number ranges from FirstNet allocations, end-to-end porting, premium and international destinations on approval, and managed connectivity and dedicated cross-connects.

What FirstNet does for you

Why FirstNet

- ✓ **Licensed.** ICASA-licensed South African voice termination and origination.
- ✓ **Resilient.** Twin geo-redundant data centres in Johannesburg and Cape Town.
- ✓ **Transparent.** Call-quality reporting and real-time analytics on your traffic.
- ✓ **Accountable.** We deliver it. We support it. We own the outcome.

Getting started

- 1 Scoping call.** Share your route mix, monthly volume and quality targets.
- 2 Interconnect testing.** We test the connection and agree commercials before contract.
- 3 Go live.** Onboarding, monitoring and monthly service reviews from day one.

What we will need from you: your route mix, expected monthly volume and call-quality targets.

Let's elevate your voice network.

Book a wholesale voice scoping session with your FirstNet account team.
